MATTHEW LAW

Senior Software Engineer

Senior software engineer with 10+ years of experience building backend-heavy systems in C# and .NET, with a strong focus on architecture, extensibility, and system quality. Regularly trusted with technical ownership, cross-cutting decisions, and mentoring responsibilities. Comfortable operating as a senior individual contributor or stepping into technical leadership roles where direction, clarity, and judgement are required.

WORK EXPERIENCE

Entelect | Intermediate => Senior Software Engineer
Jun 2022 – Present

Progressed to senior engineer, owning C#/.NET backend systems and APIs. Designed multi-tenant, extensible architectures and modernised legacy platforms. Implemented OAuth2/JWT-based security patterns, contributed to client-facing system architecture decisions, and mentored engineers on code quality and best practices.

Dariel | Software Engineer + Mentor
Mar 2020 – May 2022

Delivered backend and full-stack solutions across multiple client projects using .NET and modern web technologies. Later provided one-on-one mentorship to junior engineers through the company's formal mentorship programme.

Securities & Trading Technology | Junior => Intermediate Developer
Dec 2015 – Feb 2020

Progressed from junior to intermediate developer while building and supporting production financial systems in regulated, high-reliability environments, including live market and custodial platforms.

SKILLS

C#/.NET

System Architecture

Mult-Tenant Systems

APIs & Security

Typescript/Node

HOBBIES

Dungeons & Dragons
Coding side-projects
Video Games
