

MATTHEW LAW

// Senior Software Engineer · Backend Systems · APIs · Architecture

I build backend-heavy systems and APIs, and I've been doing it for over 10 years, mostly in fintech, banks and stock exchanges, where things are heavily regulated and expensive to get wrong. Multi-tenant platforms, secure APIs, and a lot of legacy that had to keep running while it got better. Backend is where I'm most comfortable, but I work across the stack when the job needs it. I usually end up holding the cross-cutting decisions and mentoring the people around me, whether or not that's my title.

EXPERIENCE

// Jan 2024 – Present

Senior Software Engineer @ **Entelect**

- Led a team of four on a platform modernisation, delivering an Angular 11 to 19 upgrade and improved unit test coverage.
- Own the multi-tenant, plugin-based platform architecture, including per-tenant plugin authorisation.
- Design and maintain backend systems and APIs in C#, .NET and ASP.NET Core across client-facing and internal platforms.
- Define secure authentication and authorisation patterns (OAuth2, JWT), and maintain shared NuGet and npm libraries.
- Identified and delivered CI/CD pipeline improvements outside assigned project scope.
- Mentor engineers through code review, and act as the technical decision point on cross-cutting concerns in client engagements.

`C#` `.NET` `ASP.NET Core` `OAuth2` `JWT` `Entity Framework` `TypeScript` `Angular`

// Jun 2022 – Jan 2024

Intermediate Software Engineer @ **Entelect**

- Led a small team building a shared authentication package, since adopted by other departments at the client.
- Advised delivery teams on authentication design and OWASP standards, drawing on prior fintech experience.
- Built backend systems and APIs in C# and .NET, contributing to the multi-tenant, plugin-based architecture.
- Refactored legacy codebases as part of ongoing modernisation, reducing technical debt.

`C#` `.NET` `JWT` `TypeScript` `Angular`

// Dec 2021 – May 2022

Mentor @ **Dariel**

- Ran weekly mentoring sessions for junior engineers, voluntarily and outside working hours.

- Coached on development best practices, code quality and problem-solving within production codebases.

- Guided juniors through unfamiliar architectures, and helped a few finish personal projects they had wanted to build.

C# ASP.NET MVC Angular Azure Apache NiFi gRPC

// Mar 2020 – May 2022

Software Developer @ **Dariel**

- Delivered backend and full-stack solutions across multiple client projects in C#, .NET, ASP.NET and Angular.

- Built APIs and integrations with external systems using REST, gRPC, Azure, Firebase and Apache NiFi.

- Advised stakeholders on technology selection, presenting capacity and delivery trade-offs to inform scope decisions.

C# .NET ASP.NET JavaScript SQL Angular Azure Firebase Apache NiFi gRPC

// Jan 2019 – Feb 2020

Intermediate Software Developer @ **Securities & Trading Technology**

- Identified that a client's reporting engine ran user-uploaded SQL as raw text, and argued for upload validation with a maker-checker approval flow.

- Replaced hardcoded values such as tax rates with a centralised constant, reducing a subsequent rate change to a single-file update.

- Developed and maintained market data and custodial platforms operating in live financial environments.

- Worked across backend and frontend in C#, SQL, JavaScript and Angular.

C# SQL JavaScript Angular

// Dec 2015 – Dec 2018

Junior Software Developer @ **Securities & Trading Technology**

- Delivered BBO and custodial solutions for the ZAR X stock exchange environment, live from February 2017.

- Developed financial systems and contributed to internal frameworks in C#, SQL, JavaScript and Angular.

C# SQL JavaScript Angular

CREDENTIALS

// Sep 21, 2026

Claude Certified Developer - Foundations @ Anthropic

// Sep 26, 2016

MCSD: App Builder @ Microsoft

EDUCATION

// 2015.01 - 2015.11

Microsoft Certified Solutions Developer (MCSD) @ CTU

- Software development using C#, SQL Server.
- Learnt to use tools such as Visual Studio, Expression Blend 4, SQL Server and Unity.

// 2011.01 - 2014.12

Computer Software Engineering @ SSir Online School

- ICT Theory
- Software Engineering in HTML, Java and MS SQL.

// 2001.01 - 2014.12

IEB National Senior Certificate @ St. Dunstan's College

- Grades 1 => 12
- Activities and societies including Extra Art, Rowing Club and Advanced Mathematics.

TOP SKILLS

C# / .NET · System Architecture · API & Web Security · Multi-Tenant Design · TypeScript / Node.js · Unit Testing

TECHNOLOGIES

C# · .NET · ASP.NET Core · OAuth2 · JWT · Entity Framework · TypeScript · Angular · ASP.NET · MVC · Azure · Apache NiFi · gRPC · JavaScript · SQL · Firebase

HOBBIES

Dungeons & Dragons · Side Projects · Video Games · Reading
