

MATTHEW LAW

// Senior Software Engineer · Backend Systems · APIs · Architecture

I build backend-heavy systems in C# and .NET, and I've been doing it for about 10 years. Most of that has been in fintech, banks and stock exchanges, where things are heavily regulated and expensive to get wrong. Multi-tenant platforms, secure APIs, and a lot of legacy that had to keep running while it got better. Backend is where I'm most useful, but I don't avoid the rest of the stack. A fair amount of my work has been TypeScript, Node, and Angular when that's what the job needed. Most of what I know about architecture came from supporting those systems afterwards, not from designing them upfront. I usually end up holding the cross-cutting decisions and mentoring the people around me, whether or not that's my title.

EXPERIENCE

// Jan 2024 – Present

Senior Software Engineer @ Entelect

- Own backend systems and APIs for client-facing and internal platforms.
- Lead multi-tenant, plugin-based architecture design and legacy modernisation.
- Implement secure auth patterns (OAuth2/JWT) and reusable libraries.
- Mentor engineers and guide architectural decisions in client engagements.

C#

.NET

ASP.NET Core

OAuth2

JWT

Entity Framework

TypeScript

Angular

// Jun 2022 – Jan 2024

Intermediate Software Engineer @ Entelect

- Built reliable backend systems and APIs in C#/.NET.
- Contributed to multi-tenant and plugin-based architecture evolution.
- Refactored legacy systems to improve maintainability and reduce technical debt.
- Worked across the stack using TypeScript and Angular when needed.

C#

.NET

JWT

TypeScript

Angular

// Dec 2021 – May 2022

Mentor @ Dariel

- Mentored junior engineers through code reviews and technical guidance.
- Focused on improving code quality and problem-solving skills.
- Helped navigate real project challenges and understand architectures.
- Developed skills in constructive feedback and team leadership.

C# ASP.NET MVC Angular Azure Apache NiFi gRPC

// Mar 2020 – May 2022

Software Developer @ Dariel

- Delivered backend and full-stack solutions across multiple client projects.
- Implemented APIs and integrated external systems.
- Worked with REST, gRPC, cloud services, Firebase, and Apache NiFi.
- Adapted quickly to new codebases and delivered maintainable solutions.

C# .NET ASP.NET JavaScript SQL Angular Azure Firebase Apache NiFi gRPC

// Jan 2019 – Feb 2020

Intermediate Software Developer @ Securities & Trading Technology

- Developed and maintained production financial systems in high-reliability environments.
- Implemented new features and improved internal frameworks.
- Worked across backend and frontend with C#, SQL, JavaScript, and Angular.
- Collaborated with stakeholders to deliver robust domain-specific solutions.

C# SQL JavaScript Angular

// Dec 2015 – Dec 2018

Junior Software Developer @ Securities & Trading Technology

- Developed new financial solutions and contributed to internal frameworks.
- Worked with C#, SQL, JavaScript, and Angular on financial systems.
- Delivered BBO and Custodial solutions for the ZAR X environment.
- Gained experience in production system delivery under live constraints.

C# SQL JavaScript Angular

EDUCATION

// 2015.01 - 2015.11

Microsoft Certified Software Development Professional (MCSD) @ CTU

- Software development using C#, SQL Server.
- Learnt to use tools such as Visual Studio, Expression Blend 4, SQL Server and Unity.

// 2011.01 - 2014.12

Computer Software Engineering @ SSir Online School

- ICT Theory
- Software Engineering in HTML, Java and MS SQL.

// 2001.01 - 2014.12

IEB National Senior Certificate @ St. Dunstan's College

- Grades 1 => 12
- Activities and societies including Extra Art, Rowing Club and Advanced Mathematics.
